

# Seminar

## September 20th 2018

L'utilisation des pièges photos pour étudier l'impact des prédateurs introduits

---

*Use of camera trapping to study impacts of introduced predators*

**9h-9h20: Lucas Lamelas Lopez** (University of Azores), Applying camera trapping to detect and monitor introduced predators on oceanic islands

**9h20-9h40: Yahaia Soulainana Mattoir** (Life + Petrels), Use of camera traps for endemic petrels conservation

**9h40-10h00: Adrien Chaigne** (TAAF), The use of camera traps in the French Southern territories: the case study of predation by cats on Wandering albatross chicks in Kerguelen

**10h-10h20:** tea/coffee break

**10h20-10h40: Sebastien Albert** (UMR PVBMT), Palatability of native fruits and seeds in tropical rain forest ? Using camera traps to understand the role of introduced seed predators

**10h40-11h00: Matthieu Lecorre** (Entropie, UR), the use of camera trap to investigate mice-seabird interactions at Tromelin island and other surprising by-products of camera trapping at seabird breeding places

**11h-12h00:** Table ronde et discussions

- ▶ Ouvert au public
- ▶ 15' présentation + 5' questions

Quand : 20 septembre 2018

Où : Pôle de Protection des Plantes, Salle 1

Temps : 9h-12h

Contacts:

PNR: Marc Salamolard

UR: Claudine Ah-Peng
